

# ASSISTIVE LISTENING AND AUDIO DESCRIPTION

All TPAC venues have listening devices available to borrow free of charge during your visit. Those who are hard-of-hearing can benefit from amplified sound delivered through over-ear headphones (T-coil loop is also available for use with compatible hearing aids). These devices will also deliver Audio Description when that service is available.

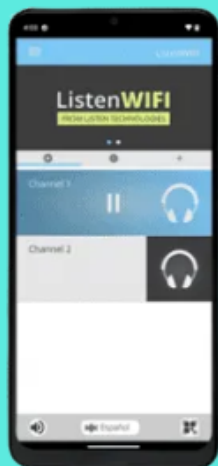

*Bluetooth headphones are not compatible.*

There is also a free mobile app that can be downloaded for use on your own device with your preferred headphones or hearing aids. Please use this QR code to download the [ListenWIFI](#) app.

When you visit TPAC, join our public Wi-Fi and see Guest Services to connect within the app.

For iPhone & Android Users
